

LOADMAXX AND QUICKLOAD

From dump trucks to delivery vans, both LoadMaxx and QuickLoad are two valuable options for a wide variety of straight trucks with both mechanical and air suspensions. LoadMaxx and QuickLoad scales offer simple-to-read, accurate in-cab displays with built-in warning and target weight alarms. The economical QuickLoad scale provides the same accuracy as LoadMaxx without the advanced communication features. These scales support most mechanical suspensions including: Hendrickson walking beam, TufTrac, Camelback, F550/650/750, and more.

Features & Benefits

- Dual point calibration - empty and fully loaded
- Maximize onsite loading
- Eliminate trips to public scales
- Reduce liability from overloading
- Supports most mechanical suspensions: Hendrickson walking beam, TufTrac, Camelback, F550/650/750, and more

Applications

Gravel/Aggregate, Grain, Scrap metal and debris, Fly Ash, Frac Sand, Refuse, Liquid Bulk, Utility Work Trucks, Vac Trucks, and any other weight sensitive application.
