

LOADMAXX TRACTOR SCALE

LoadMaxx tractor scales display accurate tractor weight information for both air and mechanical suspensions on a convenient in-dash display. With the Bluetooth capabilities of LoadMaxx, the scale can be paired with Air-Weigh's LoadMaxx app, turning any Smart device into a scale display.

Any tractor equipped with a LoadMaxx tractor scale will automatically display trailer weight data from Air-Weigh equipped trailers. No special tractor/trailer connection is necessary. The LoadMaxx scale is a true drop and hook system.

Features & Benefits

- Pin protected settings
- Transmits weights to truck's data bus
- Dual point calibration – empty and fully loaded
- Automatically reads and displays LoadMaxx trailer scale weight
- Accurately measures steer and drive axle group weights, GWW, and Net Payload
- Eliminate trips to public scales
- Reduce liability from overloading
- Decrease equipment maintenance
- Load safely and legally
- Maximize onsite loading
- Avoid overweight fines

Applications

Weight sensitivity applications.
