

QUICKLOAD DEDICATED

The QuickLoad Dedicated scale is an economical option typically used by owner operators or small fleets who keep the same trailer coupled to the same tractor daily. QuickLoad Dedicated allows trailer weights to be viewed on the in-cab tractor display without having to install a scale on the trailer. While QuickLoad is the most economical scale, it is no less accurate or durable. The QuickLoad scale display can show up to four axle groups on one tractor/trailer combination for B-trains and similar applications.

Features & Benefits

- Accurately measures steer, drive, and trailer weights in the cab
- Built-in warning and target weight alarms
- Maximize onsite loading
- Avoid overweight fines

Applications

For any weight sensitive application. Perfect for the owner/operators with dedicated tractor/trailers.
