

## AIR SPRINGS

### AIR SPRINGS

Made with a unique fabric material, TRP Air Springs have a 50 PSI higher burst rating than the competition. The vulcanized material has been chemically formulated to withstand ozone effects to resist cracking and splitting. The wall thickness is optimized to provide a better fatigue life, while providing a lightweight air spring. Available for all truck and trailer applications, TRP Air Springs are 100% leak tested and provide a cost effective solution toward improved driving safety and comfort level of all air-suspended commercial vehicles.

### FEATURES & BENEFITS

- » Made with a Natural Rubber Blend with No Fillers, Allowing Greater Flexibility While Retaining Required Strength.
- » Bellows Use Thick Nylon Yarn for Enhanced Reinforcement
- » Thinner Rubber Walls Allow Greater Ease of Flexing, Generating Less Heat and Dissipating Heat More Efficiently
- » Three Layers of Corrosion Protections for Top Plates and Anti-Oxidation Material Blended into the Rubber
- » Produced in North America
- » 2 Year, No Hassle Warranty
- » On Average, Total Cost Of Ownership is Lower Product Performance is Greater than Budget Competitors

### RELATED PARTS

For maximum suspension performance and life, it is recommended that at time of installations all shocks, bushings and height control valves are inspected and replaced as needed.
